</tr>
</tbody>
</table>

* Full Scale = -1.0 kg/cm²

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

All models indicate vacuum, but vacuum specification applies to 3, 10, and 30 kg/cm² models only.

Not recommended for continuous use at high vacuum. Refer to XP2i-DP data sheet for gauges that are intended for continuous high vacuum use.

DIFFERENTIAL PRESSURE MEASUREMENT UNCERTAINTIES WITH TARE

The Tare function can improve measurement uncertainties on two modules with the same full scale pressure range installed into one nVision Reference Recorder. Requires the use of an equalizing valve.

The following specifications apply to the measurement system with a logging interval of 1 second/reading:

<table>
<thead>
<tr>
<th>Full Scale Range of Both Sensors</th>

Unit must be enabled in CrystalControl

DIFFERENTIAL PRESSURE MEASUREMENT UNCERTAINTIES WITHOUT TARE

The total nVision Reference Calibrator measurement uncertainty in the ΔP mode configuration will need to consider the uncertainties of both pressure modules. We recommend the module uncertainties to be combined with the preferred square root of the sum of the squares (or "root sum squares") method.

The following table lists the possible combinations of using Pressure Modules (PM) with different accuracy statements. The uncertainties reported below are without the use of the Tare feature, which will greatly improve your measurement uncertainty.

| Upper Pressure Module Uncertainties (of Static Line Pressure) (of Reading) |
|-----------------------------|-----------------------------|-----------------------------|
| 0.025%                      | 0.035%                      | 0.056%                     |

| Lower Pressure Module Uncertainties (of Static Line Pressure) (of Reading) |
|-----------------------------|-----------------------------|-----------------------------|
| 0.025%                      | 0.056%                      | 0.071%                     |
**SENSOR**

- **Wetted Materials:**
  - (Wrench Tight) 316 stainless steel
  - (Finger Tight) 316 stainless steel and Viton® (internal O-ring)

- **Diaphragm Seal Fluid:** Silicone Oil

- **Connection:** Crystal CPF® Female

**BAROMETRIC REFERENCE (BARO)**

- **Accuracy:** ± 0.5 mbar, ± 0.00725 psi
- **Range:**
  - 700.0 to 1100.0 mbar,
  - 10.153 to 15.954 psi

- **Units and Resolution:**
  - mbar .............. 0.1
  - psi ................ 0.001
  - inHg .............. 0.001
  - mmHg ............. 0.01

- **Pressure Connection:** Cylindrical sensor fitting of 5.8mm OD. A flexible 4.8 mm [3/16"] ID tube is recommended to connect for calibration.

- **Mounting:** Secured using a 3/8" 4-40 plastic screw.

- All welded, with a permanently filled diaphragm seal.
- Metal to metal cone seal; O-ring can be removed if necessary.
- 1/4" medium pressure tube system compatible with HIP LM4 and LF4 Series, Autoclave Engr SF250CX Male and Female Series.
- CPF Adapters to NPT, BSP, and M20 available.
- U.S. Patent No. 8,794,677

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

Exposure to environmental extremes of temperature, shock, and/or vibration may warrant a more frequent recertification period.

Other units available depending on the installed modules.

Plastic non-conductive screw must be used to comply with hazardous location requirements.
Current, Voltage, & Switch Test Module (MA20)

Intended for use with a 4-20mA loop measurement. This module is also capable of measuring supply voltages and has an auxiliary fixed output for use in switch open/closure testing. Each MA20 module includes a super flexible silicone test lead kit (P/N 3952).

CURRENT & VOLTAGE MEASUREMENT

Current (mA) Input

- **Accuracy:** ± (0.015% of rdg + 0.002 mA)
- **Range:** 0 to 55 mA (MA20)
- **Max Allowable Current:** 93.3 mA
- **Resolution:** 0.001 mA or 0.01%
- **Units:** mA, % 4-20, % 10-50
- **Input Resistance:** < 17.2 Ω
- **Voltage Burden @ 20mA:** < 0.35 V
- **Voltage Burden @ 50mA:** < 0.86 V
- **HART Resistance:** 250 Ω
- **Connection:** 2mm jacks

Voltage (VDC) Input

- **Accuracy:** ± (0.015 % of rdg + 0.002 VDC)
- **Range:** 0 to 28 VDC
- **Max Allowable Voltage:** 30 VDC
- **Resolution:** 0.001 VDC
- **Units:** VDC

Switch Test

- **Switch Type:** Dry Contact
- **Closed State Resistance:** < 10 Ω
- **Open State Resistance:** > 10 MΩ

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

For hazardous location product warnings, refer to the operation manual.

mA can be displayed as a percentage, where 0 to 100% corresponds to either 4 to 20 mA or 10 to 50 mA.

Inputs protected by a resettable fuse.

Jacks are compatible with safety sheathed banana plugs.

Includes all effects of linearity, hysteresis, repeatability, temperature, and stability for one year.

Switch state change indicated by bright green LED flash.

Switch test screen reports switch open, close, and deadband values.

ATEX and IECEx Scheme Entity Parameters

The MA20 Module has these specific input entity parameters:

- **Ui = 28 V**
- **Uo = 6.6 V**
- **li = 93.3 mA**
- **lo = 4.45 mA**
- **Pi = 653.3 mW**
- **Po = 7.34 mW**
- **Ci = 0.36 uF**
- **Co = 0.5 uF**
- **Li = 39.1 uH**
- **Lo = 12 uH**

* Dependent on the supply to the terminals but shall not be greater than 0.5 uF
** Total cable inductance between all modules
Temperature Module (RTD100)

Calibrated for Pt100 RTD / PRT (100 Ohms at 0°C Platinum Resistance Temperature Detector) sensors conforming to DIN/IEC 60751 (or IEC751) with US, Euro, or Lab calibration curves. An RTD is not included, but each RTD100 includes P/N 3953 RTD Connection Kit.

Temperature Measurement

Resistive Input

**Accuracy:** ± (0.015% of rdg + 0.02 Ω)

**Range:** 0 – 400 Ohms range for use with 100 Ohm PRTs

**Resolution:** 0.01 on all scales

**Units:** °C, K, °F, R, Ω

**TCR:**
- 0.003850 Ω/Ω/°C (IEC 60751)
- 0.003911 Ω/Ω/°C (US Industrial Std)
- 0.003926 Ω/Ω/°C

**Wiring:** 2-, 3-, 4-wire support

**Connection:** M8 connector cable or terminal block

The proper selection of the RTD sensing element is very important as the error associated with this device is the majority of the overall system measurement uncertainty. IEC 751 is the standard that defines the temperature versus resistance for 100Ω, 0.00385 Ω/Ω/°C platinum RTDs. IEC 751 defines two classes of RTDs: Class A and B. Class A RTDs operate over the -200 to 630°C range versus -200 to 800°C for the Class B elements. For example, the Class A uncertainty is about half that of the Class B elements as illustrated in the following table.

<table>
<thead>

</tr>
</tbody>
</table>

The RTD100 Module has these specific input entity parameters:

- **Ui = 0 V**
- **Uo = 9.73 V**
- **li = 0 A**
- **Io = 1.6642 A**
- **Pi = 0 W**
- **Po = 1.1 W**
- **Co = 0.5 uF**
- **Lo = 12 uH**

* Total cable inductance between all modules
nVision Chassis (NV)

**OPERATING TEMPERATURE**

Temperature Range: **-20 to 50°C (-4 to 122°F)**

< 95% RH, non-condensing. No change in accuracy over operating temperature range. Gauge must be zeroed to achieve rated specification.

Applies to all modules.

**DISPLAY**

Screen: **255 x 160 pixel graphical display**

LCD readable in sunlight with bright backlight.

Display Rate: **4 readings/second (standard)**

up to 10 readings/second (recording)

**POWER**

The nVision is Intrinsically Safe only if powered by one of the following battery types.

**ATEX/IECEx:**

<table>

</table>

4 x AA: **200 hours, typical**

Ultra Low Power: **Up to 60 days, typical**

*2 installed modules, 1 reading per 5 minute recording interval, and 23°C ambient temperature.

Uses 4 alkaline AA (LR6) batteries. Use of backlight reduces operating time.

For hazardous location product warnings, refer to the operation manual.
**DATA/COMMUNICATION**

- **Digital Interface**: mini-USB

**DATALOGGING**

- **Capacity**: Approx. 1,000,000 data points*
- **Storage Type**: Non-volatile flash memory
- **Fastest Interval**: 10 per second
- **Slowest Interval**: 1 per hour

*Single Module Recording

- Limit of 64 individual recordings.
- The included CrystalControl software is compatible with Vista (SP 2), Windows 7 (SP 1), Windows 8.1 and Windows 10.
- Produces csv, xls, pdf, or signed pdf files, and uses Excel template files (samples included) to automatically format and graph data.

**ENCLOSURE**

- **Weight**: 680 g (24.0 oz)
- **Rating**: IP66 and IP67
- **Housing**: Impact resistant injection molded
- **Keypad and Labels**: UV Resistant Polyester
- **Mounting**: M4 x 0.7 [8 mm (0.31")] deep threaded insert mounting locations

Weight includes one pressure module, one RTD module, 4AA battery module, and protective boot.

- Submersible to 1 m for 30 minutes [IEC 60529].
- LCD protected from impact damage by 1.5 mm (0.06") thick polycarbonate lens.
- Skydrol® compatible.

For hazardous location product warnings, refer to the operation manual.
### STORAGE TEMPERATURE

**Temperature Range:** -40 to 75°C (-40 to 167°F) 

**Batteries should be removed if stored for more than one month.**

### SPECIAL FEATURES

The following requires the use of our free **CrystalControl** software

- **Averaging Screen:** Averages all points in a recording run.
- **Data Point Counter:** Screen for counting the data points logged.
- **Display Screens:** Turn on and rearrange display screens.
- **Estimated Recording Time:** A CrystalControl calculation based on active screens and logging interval.
- **Live PC Graph:** During a recording, graph directly to your PC.
- **Password Protect:** Changes to configuration or userspan calibration factor(s).
- **Pressure Switch Test:** Using a PM and MA20, get deadband and state-change pressure.
- **Remove:** Unwanted pressure units.
- **Run Tags:** Create and enable run tags that will identify logging runs.
- **Screen Numbers:** Number each display screen to make writing procedures around the nVision easier.
- **Secure Documents:** Download into secure pdf documents for tamper proof records.
- **Start-up Screen:** Define a 32-character prompt which requires user acknowledgement at startup.
- **User Defined Unit:** Define and display any pressure units not included, or to use the gauge to display force, level or other pressure related parameters.

### STANDARD DELIVERY

- nVision Recorder
- CD Manual
- ISO 17025 Accredited Calibration Certificate, NIST Traceable
- Soft Carrying Case P/N 5535
- Protective Boot P/N 3985
- Mini-USB Cable P/N 3951

### COMPLEMENTARY PRODUCTS

Crystal Engineering offers a wide range of products that work with the nVision:

- Fittings that connect without tools, safely and without leaks
- Lightweight, super flexible high pressure hoses
- Fitting kits and adapters
- Pneumatic hand pumps
- Hydraulic hand pumps
- Portable pressure comparators
- Software, for the quickest way to calibrate pressure transmitters and gauges

### CERTIFICATIONS

- **ATEX**
  - II 1G Ex ia IIB T4 Ga or T3
  - SIRA 09 ATEX 2008X
- **IECEx**
  - Ex ia IIB T4 Ga or T3
  - IECEx SIR 09.0053X

Exia Intrinsically Safe and Non-incendive for Hazardous Locations: Class I, Division 1, Groups C and D, Temperature Code T4/T3A/TCB/T3C. For hazardous location product warnings, refer to the operation manual.

nVision complies with the Electromagnetic Compatibility and the Pressure Equipment Directives.

nVision complies with the Australian Radiocommunications (Electromagnetic Compatibility) Standard 2008.

nVision is approved for use as a portable test instrument for Marine use and complies with Det Norske Veritas’ Rules for Classification of Ships, High Speed & Light Craft and Offshore Standards.

### ACCESSORIES

- **BARO Calibration Kit** P/N 4547
- **Magnetic Hanging Strap** P/N 5177
- **Waterproof Carrying Case** P/N 2888
- **RTD Terminal Block** P/N 3953 (included with RTD100 module)
- **Test Lead Kit** P/N 3952 (included with MA20 Module)
AMETEK offers a variety of solutions for pressure generation and measurement. Our line of products for pressure generation includes everything from small pneumatic hand pumps to a precision, hydraulic pressure comparator capable of generating up to 15,000 psi / 1000 bar / 100 MPa.

All of our pumps may be ordered as part of a Pump System, complete with an nVision and delivered in a sturdy carrying case with custom insert.

*Refer to the following page for a more detailed description of each pump system.

(Add one digit of resolution for differential mode.)

**AMETEK offers a variety of solutions for pressure generation and measurement. Our line of products for pressure generation includes everything from small pneumatic hand pumps to a precision, hydraulic pressure comparator capable of generating up to 15,000 psi / 1000 bar / 100 MPa. All of our pumps may be ordered as part of a Pump System, complete with an nVision and delivered in a sturdy carrying case with custom insert.

*Refer to the following page for a more detailed description of each pump system.

**Ordering a Pump System Only**

Any pump system, carrying case, and connection fittings for an nVision reference recorder may be ordered separately from the gauge. Enter NV-NONE followed by the Pump System part number and the Carrying Case option code.

**SAMPLE PART NUMBERS**

NV-NONE-GWX-W  System G pump system with a waterproof carrying case.

*KG versions available in USA direct from factory only.
